

# Who You Gonna Call?

*When your baseball or softball player has an injury,  
where will you turn for treatment?*

That used to be a difficult question, but not any more...

Concorde Sports Medicine has assembled an "all-star" team of throwing specialists to offer comprehensive evaluation, treatment and rehabilitation for baseball and softball injuries.

Our expert staff can look beyond the symptoms to the source of the problem, from joint instability to abnormal biomechanics and from training preparation to overuse.

Whether you are a college pitcher or a little leaguer, we have a program that is tailored to your level of competition and your injury needs.

## Expert Advice & Treatment - ASAP!

*No more "take 2 weeks off & see how you feel"...*

Our goal is to keep baseball & softball players on the field - where they belong - with expert intervention and close cooperation with coaches. We want athletes back in the game **ASAP** - not only as **soon** as possible, but as **safely** as possible!

Finally -- A rehabilitation program close to home, speaking the language of baseball and softball, and working with the most up-to-date information on rehabilitation of the baseball and softball athlete.

With convenient locations in Belden Village and Alliance, the Concorde Baseball Team of professionals is ready to work with you. For more information on the baseball & softball services at Concorde, ask your doctor, or contact Thom Krupar at the Belden Village office (330-493-4210) or Jason Rusznak at the Alliance office (330-829-2338).

***"Stay in the Game!!"***

**Belden Village**  
4645 Belpar Street NW  
Canton, OH 44718  
**330-493-4210**

**Alliance**  
2484 West State Street  
Alliance, OH 44601  
**330-829-2338**

# A Team of Professionals...

## Thom Krupar, PT, Cert. MDT

Thom is the Coach/Manager of **Team Concorde** -- he has been working with baseball players since 1993 as a pitching coach and physical therapist. Thom performs a comprehensive assessment of throwing biomechanics to determine the sources of pain, followed by the development of a comprehensive rehabilitation plan and implementation of a functional progression of throwing activities.

## Tim Murphy, MA, PT, ATC

Tim is a recognized author & speaker on the management of shoulder instabilities in the overhead/overuse athlete. He is currently leading the team in clinical research projects related to controlling the "loose" shoulder.

## Jason Rusznak, MPT, ATC

Jason is the Facility Manager in Alliance, and combines firsthand knowledge of baseball as a collegiate player and NCAA Umpire with his expertise in injury assessment and rehabilitation.

## Jason Vickers, MEd, ATC

Jason is a specialist in functional training and rehabilitation, incorporating the key concepts of scapular stabilization and core strength with transitional throwing progression and return to play.
